

What's new in prostate cancer research? Find out at the APCRC-Q Seminar Series 2012

Tuesday 13th March 2012, Russell Strong Auditorium

Dr Martin Berry

Associate Member, USANZ

Member and Deputy Chairman, Urology Oncology Program (NSW)

Associate Professor University of New South Wales

"Prostate Cancer: a clinician's evolutionary perspective"

Martin Berry was appointed as the first Director of the Liverpool Hospital Cancer Therapy Centre and Director of Radiation Oncology in 1994. As the Area Director of the South Western Sydney (SWS) Cancer Service from 1999-2004, he implemented many initiatives to develop cancer services such as site specific tumour programs across the area and the first Cancer Care Coordination Service in NSW. A/Professor Berry was instrumental in establishing a cooperative radiation oncology training program in NSW and pioneered the first Australian and New Zealand radiation workshops for pre-fellowship trainees along with multidisciplinary national workshops for trainees in paediatric and urological oncology. In 2006 Martin was elected deputy chair of the Urological Oncology section of the NSW Oncology Group and has overseen the development of a state-wide plan for urological oncology, which includes a multidisciplinary education program for specialists and trainees, as well as a national education strategy for prostate cancer support groups in collaboration with the Prostate Cancer Foundation of Australia.

Professor Pamela Russell

Professor, Head of Biomedical Imaging and Prostate Cancer Models, APCRC-Q
Institute of Health and Biomedical Innovation, QUT

"Improving Imaging for Diagnosis, Staging and Monitoring of Treatment Efficacy for Prostate Cancer"

Russell Strong Auditorium, Basement Level, Main Building, Princess Alexandra Hospital

Refreshments: **from 4.45pm**

Presentations: 5.15pm-6.15pm

Networking: 6.15pm-6:45pm

RSVP for catering purposes: prostatecentre@qut.edu.au
