

What's new in prostate cancer research?

Find out at the APCRC - Q Seminar Series 2011

Dr Elizabeth Williams

Laboratory Head, Cancer Metastasis Laboratory,
Centre for Cancer Research
Monash Institute of Medical Research,
Monash University, Melbourne

“Tumour cell plasticity and disease progression”

Dr Elizabeth Williams, BSc (Hons), PhD, has worked in the field of cancer metastases, focussing on prostate and bladder cancer, since completing her PhD in pharmacology in 1996. She joined the Monash Institute of Medical Research's Centre for Cancer Research in 2006 to lead the cancer metastases research group. Prior to joining MIMR, Dr Williams was an Associate Senior Fellow at the Department of Surgery, University of Melbourne and a Research Fellow (Prostate Cancer Group Leader) at the Bernard O'Brien Institute of Microsurgery.

Dr Stephen McPherson

Postdoctoral Fellow, Australian Prostate Cancer Research Centre QLD
Institute of Health and Biomedical Innovation, QUT

“Exploring the contributions of non-androgenic hormones to Castrate Resistant Prostate Cancer”
