

Making connections at the tumour interface in prostate cancer

Professor Gail Risbridger

Prostate Cancer Research Program

Deputy Dean, Strategic Projects

MCCC Research Director

Monash University

Professor Gail Risbridger is an NH&MRC Research Fellow and a career academic and researcher with > 20 years' experience in Prostate Cancer research and Men's Health. She is currently Deputy Dean Strategic Projects and leads the developments of Monash Comprehensive Cancer Consortium (MCCC) and Monash Partners Academic Health Science Centre. She is the Research Director of MCCC and Chair, Faculty Research Centres & Institutes Committee.

Her research interests include the biology of stromal-epithelial cell interactions in normal and prostate cancer tumour tissue using tissue recombination, animal and human specimens. She pioneered the use of stem cells for recombination studies combining stem cell biology with endocrinology. She is a member of The Endocrine Society USA, Endocrine Society of Australia, British Endocrine Society, European Society of Endocrinology and Women in Endocrinology (US and AUS) for which she has held numerous positions of office.

Her awards include an International Fulbright Senior Scholar Award, British Endocrine Society Asia-Oceania Medal and Honorary Life Member of Endocrine Society of Australia.
